

## Tray Fastener T-Slot

Tray fastener T-Slot is a kit for mounting feeding trays directly against our aluminum bar. The kit makes the tray fully adjustable in X axis.

The kit consists of 4 screws, 4 washers with self-adhesive metal tape and 4 T-slot nuts with spring loaded ball.

Holes are to be drilled in the feeding tray, then the tray is easily mounted on top of the aluminum bar in suitable position with 4 hex screws.
